

Property Flipping Business Workflow Summary

Centralized Operational Pipeline for a Scalable Real Estate Investment Business

1. Acquisition Workflow

Lead → Qualification → Property Analysis → Offer → Under Contract → Due Diligence → Closing

2. Rehab Workflow

Scope of Work → Budget → Demo → Rough-In → Interior Finish → Punch List → Staging → Ready to List

3. Listing Workflow

Photos & Video → Property Details → MLS Setup → Agent Portal → Listed → Showings → Offers

4. Sale Workflow

Offer Accepted → Inspection → Negotiation → Appraisal → Title & Loan Processing → Closing → Sold

5. Accounting Workflow

Budget Setup → Invoice Tracking → Expense Approval → Payment Processing → Budget vs Actual → Final P&L;

Strategic Goal: Create a centralized “single source of truth” platform that reduces founder dependency, streamlines communication, improves accountability, and allows the business to scale efficiently.

Core System Components: • Property database & status engine

- Agent information portal
- Contractor & rehab tracking
- Budgeting and profitability analytics
- Document storage & photo management
- Event timeline logging
- API integrations (Flipper Force, MLS, QuickBooks, etc.)
- AI-powered summaries and operational insights
